Dear Sirs,

The maritime industry is developing fast in all sectors, be it areas of offshore engineering equipment and sophisticated technology, or simply on the human factor for manning ships of any nature and type, so sourcing for high level professionals who know how to operate such equipment and conversely ships, becomes an absolute necessity.

Ukraine, and Odessa in particular, has a great tradition and potential for the development and training of seafarers for a wide spectrum of the shipping community, maritime higher education, training courses and also offshore training centres. The availability of easy learning candidates (seafarers) and a good training base allow us to create new HR projects to satisfy client requirements. Also major factors in the success of the Ukrainian seafarers are their European mentality, professionalism and high level of education. Moreover over the years a special relationship has been established with Greek Shipping!

Our company, with a view to meeting the increased requirements of the shipowners for highly qualified specialists, knows how to select and train such professionals. The company was founded in 2001, and licensed by the Ministry of the Social Policy of Ukraine, certified by MLC 2006 and ISO 9001: 2008. It was established to provide professional and competent crewing services to foreign employers to their full satisfaction. Our company has successful cooperation with such Greek shipping companies as: "Meandors Lines SA" - bulk carriers, TMS Tankers LTD – tanker fleet, Intertrade Management Inc, (Kagiapas shipping) - bulk carriers, Norway Ship Management company TFDS – offshore supply vessels, Israely company Buffalo Shipping SA – bulk carriers, Offshore project with Samicor group, Rawabi Swiber Offshore Services, and other companies.

We man all types of vessels such as bulk carriers, containers, reefers, tankers, even cruise and passenger ferries, etc., as well as AHTS, PSV, ROV SV, DSV, AHT, WSV, Crew Boats. One of our main strengths is development of HR strategies and providing well qualified and experienced crews for developing shipping and offshore projects from the initial stage. Based on our previous practice we are ready to start new specific projects and provide either full range crew management or render separate service including recruitment of single specialists.

We invite you to visit our website and find more detailed information For Shipowners, or contact us on Facebook.

With best regards,
Director of maritime agency "Master Ltd."
Olena Kashuba
